DOOR GUIDE

INSTALLATION INSTRUCTIONS

1. Installing Your Door Guide

- Slide both doors to the open position. Slide the back door (closest to the wall) out several inches to gain access to the Door. This is where you will install the Guide.
- On the back Door, Pencil a line 1-1/16" parallel to the edge of the door that is closest to your Door opening.
- With the edge of the Bracket **back** lined up with the line you just penciled, shift the Bracket up slightly so the mortise (see below) along the bottom of the front Door will slide over the vertical Bracket edge.
- With a Phillips drill bit, drill a Grabber Screw into each hole in the Bracket back plate.

A mortise is the channel that runs along the bottom of your Door.

2. Aligning Front Door Over Door Guide

- Slide front Door so the mortise along the bottom of the Door slides over the vertical Bracket edge.

HANGER HOLES

INSTALLATION INSTRUCTIONS

1. Installing End Plates

- Position one of the End Plates over the bottom edge of the front Door, aligning the bottom of the Bracket with the Bottom of your Door.

- Using your drill with a Phillips bit, drill a Grabber Screw into each of the two holes in the End Plate.
- Attach the other End Plate on the opposite edge of this Door, aligning the bottom of the End Plate with the bottom of the Door, covering the mortise.
